

Brannon Steel supplies quality carbon steel parts to Original Equipment Manufacturers in the off-road construction, railroad locomotive and freight car, agricultural, automotive and materials handling industries, as well as large and small custom fabricators.

We recognize that environmental management is an integral part of our management function and that protection of the environment is a key element in good business practice.

As such, Brannon Steel is committed to conducting business according to the following principles:

- Complying with applicable acts, regulations, by-laws and other environmental standards to which we subscribe.
- Continually improving our environmental management objectives and activities.
- Communicating our environmental objectives, and our performance against those objectives, throughout the company and to external parties where approved by Senior Management.
- Minimizing our use of hazardous materials and preventing their release into our environment.
- Optimizing our consumption of resources including the reduction, re-use and recycling of waste wherever possible.
- Working closely with our customers and suppliers to establish responsible environmental standards.
- Adopting a forward-looking view on business decisions that affect our environment.
- Training our staff in their environmental management responsibilities.
